

DEBUGGING THE QUERY

Event Details: -

RULES AND REGULATIONS

Participant Eligibility:

- Any individual with demonstrable programming skills in C, C++, or Python is eligible to participate. This competition is designed to assess practical programming abilities.

Internet:

- Internet access will be strictly prohibited during the entire duration of the competition. This ensures a level playing field for all participants.

Fair Play and Conduct:

- Any participant found to be using the internet or any unauthorized external resources will be immediately disqualified. This rule upholds the integrity of the competition.
- Participants are expected to program on their own.

Distribution Format:

- The programming problems will be pre-loaded and readily accessible on the allotted personal computers (PCs) provided for the challenge. This ensures a consistent starting point for all contestants.

Submission Format:

- Participants are required to save their debugged and fully functional solution files directly onto the assigned PC. This facilitates efficient evaluation by the judging panel.

Time Constraints:

- For each individual programming problem, participants will be allocated a strict time limit of 5 minutes. This constraint emphasizes efficient problem-solving and time management skills.

Judging Criteria:

- Solutions will be judged based on accuracy, efficiency, code clarity, and adherence to time limits.
- Correct output, optimized code, readable code, and speed are key factors.

Code of Conduct:

- Participants must maintain professional and respectful behavior.
- Cheating, plagiarism, or unauthorized help will lead to disqualification.

- Judges' decisions are final.
